

Final JAVA LAB - 1 hour^(14.15-15.15 +/-5)

Write a GUI application according to the following specification:

- ✓ The appearance of the GUI as shown in Fig. 1

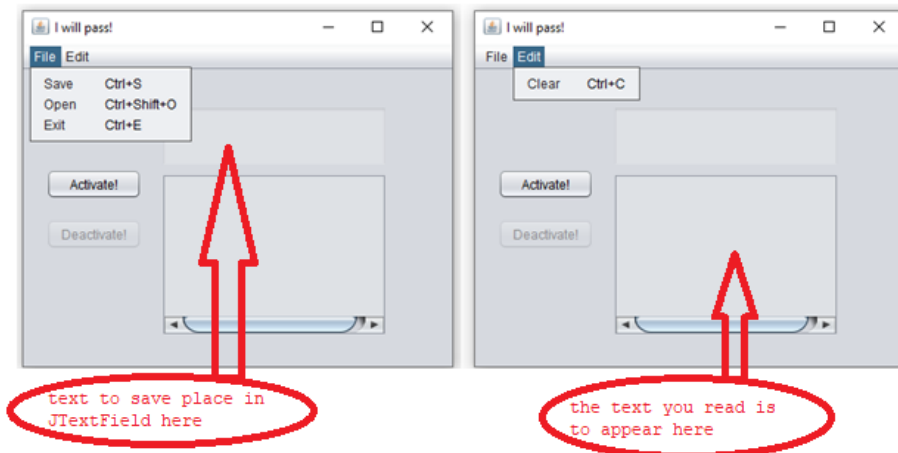

Fig.1. Main view.

- ✓ Functionalities:
 - -save (write the text from JTextField to the file "Final.txt")
 - -open (read the text from the file "Final.txt" to the JTextArea)
 - -exit (exit the application)
 - -clear (return to the initial settings)

Activate and deactivate buttons enable / disable only text field/area.

Zip the project and send it on moodle (only possible until 15.20)
